

## Digital transformation made easy

**hodeia.digital** is a young company with extensive experience in the industrial environment. Our goal is to support companies to carry out their **digitization** ideas with the **best results**.

We work with a focus on **improving the results** of our clients, helping them to be **more efficient** in their processes and guaranteeing the quality of our solutions.

**+30 countries**  
**+10 languages**  
**+ 50 plants**  
**+ 10.000 users**

**Adapted to any industry**  
**Configurable for each client**  
**Custom implementation**  
**Scalable and modular**

# BuildApp

## Digital transformation made easy

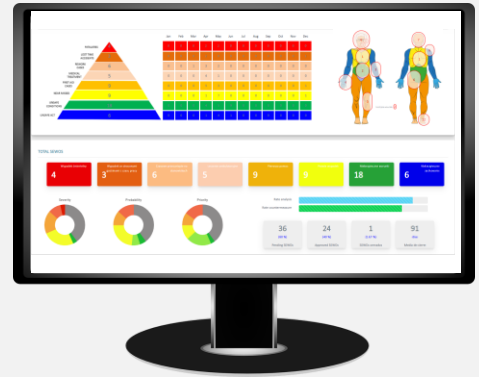

### What is BuildApp?

...is a **digitalization** standard software platform.

...is a **modular and extensible** solution.  
(In use & functionality).

...had **global** involvement: Production, Quality, Maintenance, Safety, Environment, HR...

...provides **crossed information**: available information from different departments.

BuildApp centralize external & internal data in a single and accessible site. Integration made by standard APIs with several systems as MES or ERP.

One of the key factor is the people engagement in factories, based in an accessible tablet environment customer experience app and rewards.

BuildApp allows people empowerment to collaborate, bringing disruptive ideas.

### BEST PRACTICES

Buildapp is based on **World Class Manufacturing** organization methodologies, making the knowledge and best practices accessible to any type of company.

### CASE STUDY

BuildApp is a corporate tool implemented in the multinational Unilever for daily manufacturing management of **more than 50 factories**. They can analyze the information by plant, by product, by section and benchmarking.

BuildApp is a **multi-device** platform, facilitating access to information for the entire organization. Plant operators will be able to **report information** easily and managers analyze the information in real time from anywhere in the world with different defined **KPIs and dashboards**.

## SAFETY

Greater control over safety and environmental issues to avoid incidents.

## MAINTENANCE

Accomplishing the corrective, preventive and autonomous maintenance policies.

## PRODUCTION

Monitoring real time performance indicators (integration with MES system) and manage the production plan.

## QUALITY

Configuring and carrying out all kinds of quality controls for a complete analysis of results.

## TRAININGS

Planning and controlling the knowledges, educational contents and trainings among the employees.

## SOCIAL

Enrichment in the use of the application through rating systems, walls, likes, etc.

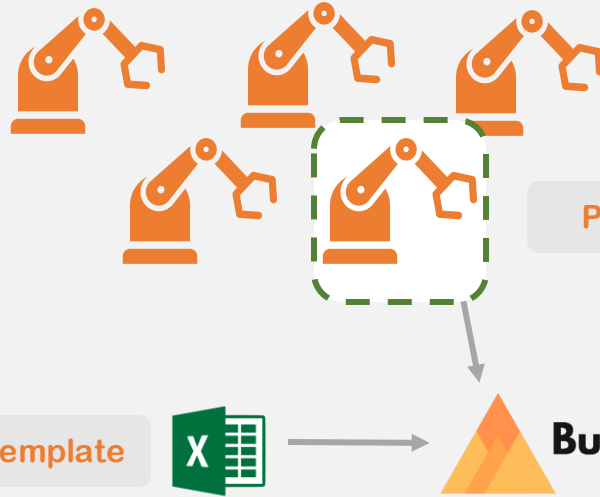

# BUILDAPP IMPLANTATION

## PHASE 1

### Pilot

Start the project by identifying a pilot area with standard modules. Quick implementation through excel templates.

3 months

ERP

MES

CMMS

Roll-out in different areas

Extra modules implantation

Different plants across the world

## PHASE 2

### Expansion

BuildApp expansion by adding advanced modules, rolling out to other areas or plants and integrations with other third systems.

6 months

## PHASE 3

### Explosion

Once we have absolute control of the different processes, incorporation of new technologies, step by step, integrated on the platform.
